

## How to set up POS staking on your home computer ElyCoin wallet

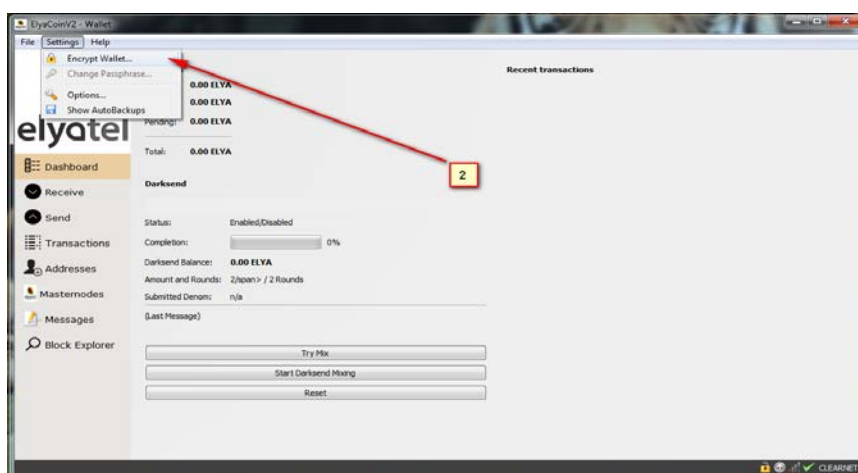

Run wallet

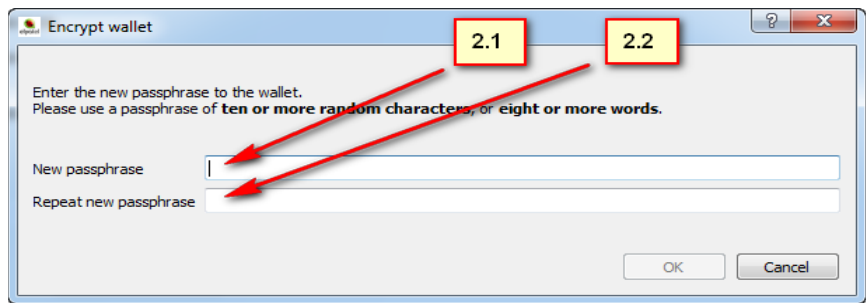

1. Waiting for wallet sync.

2. Encrypt your wallet. This is necessary for the security of your funds.

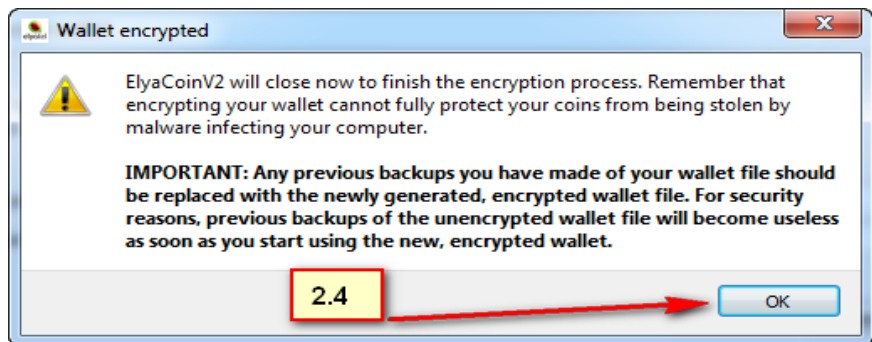

- 2.1 Write a password. You must remember your password and keep it in a safe place!
- 2.2 Confirm password

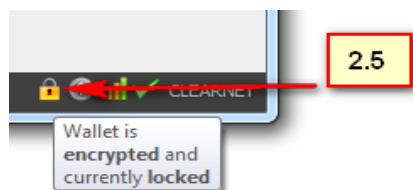

- 2.3 Read the warning and agree

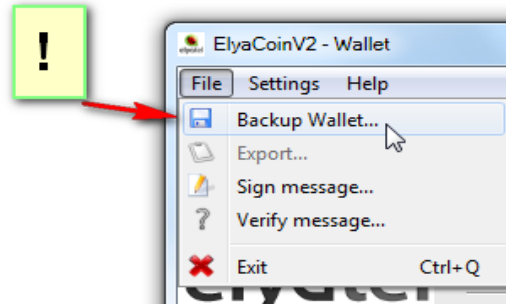

- 2.4 Click "OK". Your wallet will close, after which you need to run it again.

- 2.5 After starting and syncing, in the lower right corner, you will see that your wallet is encrypted and blocked. When you hover the mouse over the lock, you will see a message.

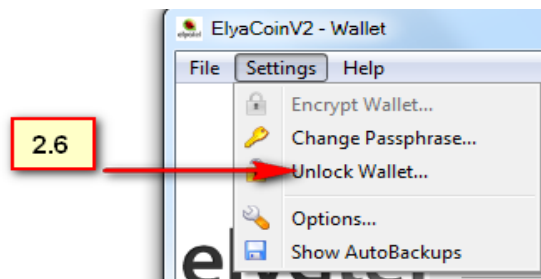

**If your wallet was not encrypted and you backed up your wallet, you need to backup again !!!**

When you first install the wallet, you have a file **wallet.dat**  
It is located here **C:\Users\User-Name\AppData\Roaming\ElyCoinV2**  
After creating a backup, you can **copy the folder and save it in a safe place.**

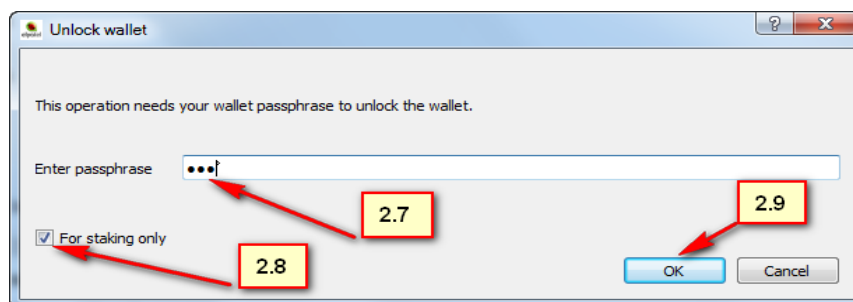

2.6 Unlock your wallet.

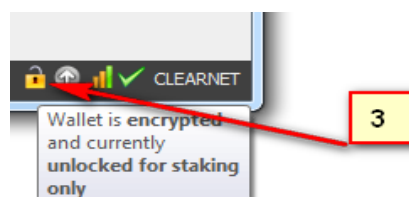

2.7 Enter password

2.8 Do not touch the tick

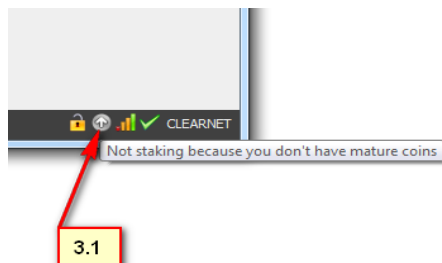

2.9 Click "OK"

3. Mouse over the lock and you should see that the wallet is unlocked.

3.1 We are waiting for the maturation of coins 24 hours.

**Your wallet should be running 24/7  
From now on, your wallet is ready for stacking.**

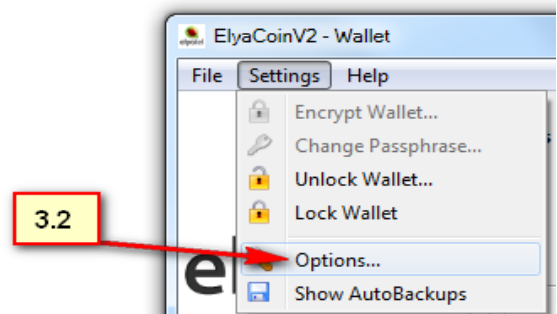

**If your balance is replenished with one transaction for a large amount, then when you receive a reward, after 24 hours (when your coins are mature), your balance is divided into two parts, reward coins will be added to one part and they will mature again 24 hours.**

**It is necessary to describe the process of calculating the remuneration. What determines the percentage of remuneration. What percentage?**

All further instructions will be for advanced users. If you doubt or are not sure that you are doing everything correctly, we recommend not doing any actions in your wallet !!! You can lose your coins forever!

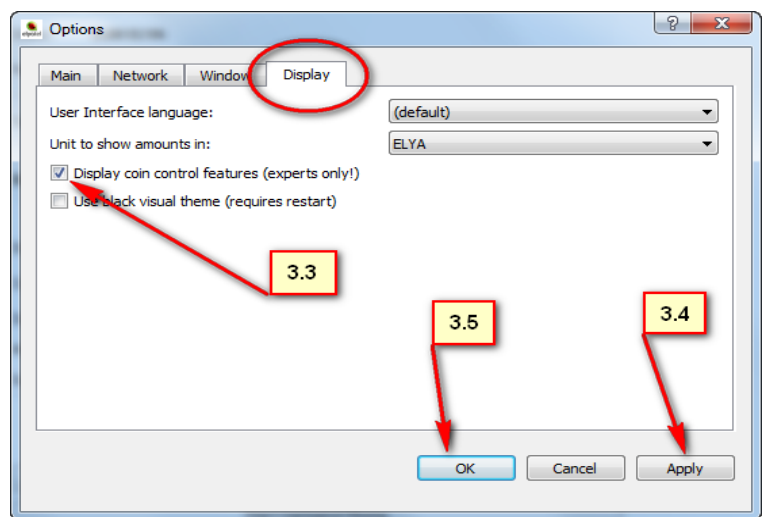

3.2 Open options window

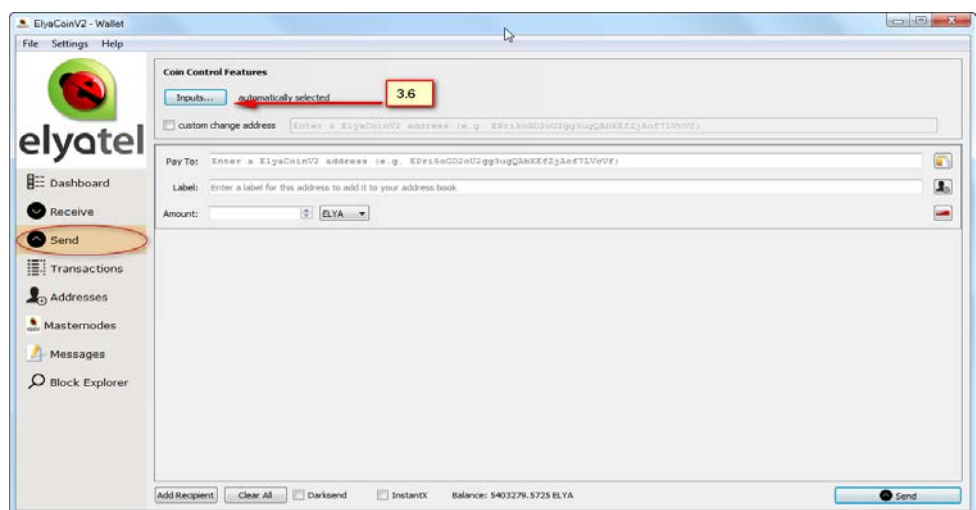

3.3 Select display tab Select an option "Display coin control features"

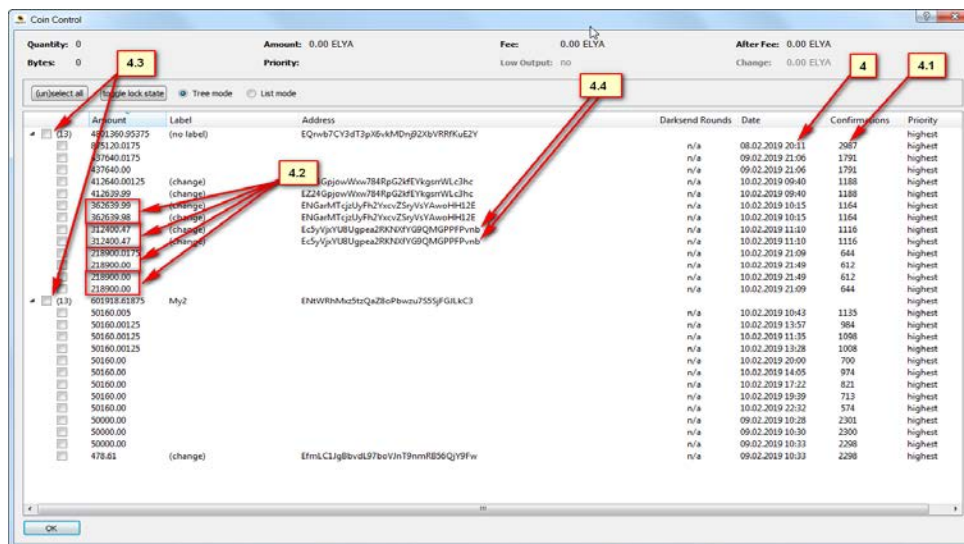

3.4 Click apply

3.5 Click "OK"

3.6 Open the send tab and click the inputs button
